

# Node JS Installation

**Step-1:** First step is to update our drivers using 'sudo apt update' command.

```
$ sudo apt update
```

**Step-2:** Install node.js using 'sudo apt install nodejs' command

```
$ sudo apt install nodejs
```

**Step-3:** Verify if it is installing successfully and the version of it by using 'node -v' command

```
$ node -v
```

**Step-4:** Install npm which allows you to install modules and packages to use with node.js

```
$ sudo apt install npm
```
